

ATTENTION ALL SOLAR PV SYSTEM INSTALLERS

Effective May 15th, 2023 submittals for Solar PV systems must include a signed contract showing a project valuation consistent with the declared valuation entered in the Cityview portal.

This change in procedure will eliminate premature submittals of projects, many of which end up expiring or being cancelled and refunded. Duplicate applications from different solar companies also cause unnecessary processing work for the permit staff. This change will result in more consistently accurate project valuations, and, will allow more timely permit processing and plan review of solar pv applications by permit techs and plans examiners.
