

# You're on a Roll!

## Because Thornton is a Safe Stop City!

A Safe Stop City means when you're riding your bike in Thornton, you can **treat stop signs as yield signs** and **red lights as stop signs, when safe to do so.**

At intersections with stop signs, slow down to 15 mph or less, and yield to anyone with the right-of-way before proceeding.

At red lights, completely stop and proceed through only if there's no cross traffic.

**GoCOT.net/bikethornton for more info.**
