# Rain Garden at Work!

This feature is a Rain Garden and it is hard at work treating stormwater runoff before it enters our local water bodies. Rain Gardens soak up and clean stormwater through filter layers and vegetation. They are a great way to beautify our city and protect local water bodies at the same time!

To learn more about the process, please scan the QR code.

CITY OF THORNTON

For the public's safety, please do not enter the Rain Garden at any time.
