

PLAN AHEAD AND PLANT AHEAD.

**Bulbs are
a bright
idea!**

Transform your yard (or just part of it) with an H₂Overhaul.

Fall is the perfect time to plant in Colorado - especially bulbs and perennials! The soil is still warm enough to help new plants build strong roots that bring big foliage growth come spring. All planting should be done by mid October before the ground becomes cold and hard.

Check out our H₂Overhaul Kit for more fall planting tips and to find out if you could get a rebate at ThorntonWater.com/H2Overhaul.

WITHOUT WATER *life would be* PRETTY DRY
