(Medical & research)</p>	<p>5 Keys to Communication Success, 2013. Dusty Jessen (Littleton, CO Audiologist)</p>

Communication Access in Health Care

A program of the Hearing Loss Association of America (HLAA)
for people with hearing loss and their companions in all medical encounters

When patients in medical settings miss out on or misunderstand verbal information about treatment, medications, or decisions – substantial medical errors, delays, and even unexpected medical procedures can happen. To help ensure patient safety, patients and healthcare providers must establish and maintain verbal effective communication.

Health Care Communication Access column in HLAAs *Hearing Life* quarterly magazine. Stay informed on topics relevant to healthcare consumers, providers, healthcare staff, administrators, medical systems, public health researchers, and patients. Sign-up yourself and invite Colorado healthcare providers to join as well. <https://communication-access-health-care.gr8.com/>

The **Guide for Effective Communication in Health Care** provides many tools and resources with two sections: patients and providers. Download the guide: <https://www.hearingloss.org/programs-events/communication-access-in-health-care/guide/>
Also, click in the right-hand column for “Stakeholder Narratives”

Invite your local hospitals, clinics, pharmacies, ADA coordinators, patient advocates, and medical providers to connect with HLAAs Communication Access in Health Care program. The program’s summary and sample letter are in link below: <https://tinyurl.com/HLAACommAccessHealthCarePgmlnv>
