

AURINIA SAXATILE

BASKET OF GOLD

A silvery mat of short green foliage gives rise to bright yellow flowers in the spring. Since its natural habitat is mountainous and rocky, it is perfect for the dry difficult areas of your yard. Plant this ground cover in sandy soil with excellent drainage. Shear off spent flower heads to maintain a tidy look. Low water, full sun.

Height 8-10" Spread 18-22"

USDA Zones: 3-8
