

ECHINACEA PURPUREA 'WHITE SWAN'

Large white flowers with prickly center cones are at home in the wildflower garden. Plant with purple Echinacea and black eyed susans. The name is derived from the Greek word for hedgehog due to the bristly center. A versatile plant that does well in a variety of conditions, full sun to part shade, tolerates clay soil, heat and humidity. Summer bloomer. Low to moderate water.

Height 24-36" Spacing 12-24"

USDA Zones: 3-8
