

ECHINACEA PURPUREA PURPLE CONEFLOWER

This wildflower has large purple-pink flowers with orange centers held on long stems. Looks great in the garden when planed together with other Echinacea species, such as paradoxa and White Swan. Divide clumps when they become over crowded. Tolerates most soils, full sun to part shade, moderate water. Height 24-42" Spread 15-20"

USDA Zones 3-8
