

Gaillardia aristata

'Oranges and Lemons'

Blanket Flower

A little softer in color than other Gaillardia, it blends well in the border. A recent English introduction. Layered peachy-orange petals with golden tips surround a gold central cone. Unique chartreuse seed heads provide additional late season interest. Water regularly until established, then cut back. Full sun, does best in poor loose soils, no clay.

Height 16-**18"** **Spread 12"**
