Penstemon grandiflorus Prairie Jewel®

This strain of penstemon is among the showiest of the northern Great Plains. Developed by Denver native Mary Anne Heacock, this plant is a standout in any low water garden. The giant flowers come in a varied palette ranging from white, rose pink, to purple with a base of silver tinged leaves. Does not like overly moist soils and does well in drought conditions.

Height 20"-36" Spread 8"

USDA Zones 3-9
