

SEDUM RUPESTRE 'ANGELINA'

STONECROP

This Sedum is electric green during the spring and summer, turning enchanting amber and rust colors in the fall. It is a great groundcover for rock gardens and the borders of perennial beds. Give it plenty of room to spread and plant it where it will cascade over rocks. Clippings root themselves easily, so if a piece breaks off tuck it into another part of your garden. Drought tolerant, does well in poor soils. Low water. Height 3-6" Spread 12-23"

USDA Zones: 3-9
