

# SEMPERVIVUM TECTORUM

## RED FLUSH

### HENS & CHICKS

This evergreen succulent is called Hens and Chicks for a reason. The mother 'Hen' produces dozens of little 'Chicks' that you can pinch off and plant throughout your garden. These tough little plants are extremely hardy and will thrive in your garden for years to come. Perfect for all the nooks and crannies in the rock garden, tuck them in where ever they fit. Very low water once established, plant in well draining soil, full sun to part shade.

Height 3-6" Spread 10-18"

USDA Zones: 3-9
