

HEMEROCALLIS 'STELLA DE ORO' DAY LILY

This very popular plant is one of the toughest you can grow, capable of thriving under the harshest conditions. Trumpet shaped lemon yellow flowers rise from lush green foliage. The blossoms only last for 16 hours, but are quickly replaced all season long. Very drought tolerant. Great for borders, planted in clumps, and strait rows. Full sun, low to moderate water (very adaptable).

Height 18-24 Spread 10-15"

USDA Zones: 2-9
