

Red False Yucca
Hesperaloe parviflora

Height: 1'-3'
Width: 3'-6'
(At Maturity)
Growth Rate: Moderate
USDA Zone: 5-10
Bloom: Red
Time: June/August
Sun: Full
Water: Very Low

This clump forming succulent, has arching, leathery, linear foliage. Unlike many of the aloe it has no spines or thorns. The Dark olive – green leaves are sparsely covered with fibrous strands along the margin adding visual texture. Deep coral pink to red blooms which have a yellow throat, are profuse along the flower stalk which can grow to three foot in height. The flowers will attract Butterflies, bees, and Hummingbirds.

The Red False Yucca is drought tolerant and will grow best in in a hot spot with in your garden. Occasional watering will encourage blooming but be sure not to over water. Remove old flower stalks after blooming has ended.
