Height: 5'-8'  
Width: 8'-10'  
(At Maturity)  
Growth Rate: Slow  
USDA Zone: 4-9  
Bloom: none  
Sun: Full  
Water: Low

**This has been the go to plant for screening in the landscape industry for years. Dense, upright, spreading branches flare outward creating a nice vase shaped shrub. Its dark mint green in color darkening some in winter. Make sure you plant this shrub where it has room to grow. Without space you will be fighting it for years and junipers do not react well to heavy pruning. They do not often produce new growth on old wood.**

**This juniper likes full sun and grows best in moist, well drained soils. However they will grow in a wide range of soils and are drought tolerant once established. They are also tolerant of urban pollution and can thrive in city conditions.**
