

Tiny Trumpets Honeysuckle
***Lonicera syringantha* 'wolfii'**

Height: 3'-4'
Width: 4'-6'
(At Maturity)
Growth Rate: Medium
USDA Zone: 4-7
Bloom: Pink
Time: May/June
Sun: Full/partial
Water: Low

This is a bush honeysuckle in which the branches grow horizontally, giving it a spreading habit. The leaves are narrow and blue green in color, which contrasts nicely with the reddish new stem growth. The flowers are very fragrant, pale violet in color, and are borne in clusters. In late summer the shrub is adorned with small red berries. This is a good candidate for hummingbird and butterfly gardens, and it also provides cover for small birds.

Tiny trumpets has no special soil requirements and will adapt to most home landscapes. It will not tolerate heavily compacted soils or extremely wet areas.
