

**Hot Wings Maple**  
**Acer tataricum "Garann"**

Height: 20'-30'  
Width: 15'-20'  
(At Maturity)  
Growth/Yr: 4"-8"  
USDA Zone: 4-10  
Seed: Red  
Time: July  
Sun: Full  
Water: Low

This tree was developed in Ft Collins and is a great maple for any front range yard especially if it isn't big enough for a 50 to 100 foot tree. Hot wing is named after the brilliant red samaras( maple seeds) that adorn the tree, in clumps, during mid-summer. It has nice green leaves that are not shaped like a typical maple leaf, but they do get fall colors ranging from red to yellow.

This tree is adaptable to our alkaline soils, and is drought tolerant. This is a relatively low maintenance tree, and is tolerant of urban conditions. It makes a great choice for any water conserving garden.
