

Canada Red Cherry
Prunus virginiana

Height: 20'-25'
Width: 20'
(At Maturity)
Growth/Yr: 12-24"
USDA Zone: 2-8
Bloom: White
Time: Late April
Sun: Full /Part
Water: Low

This variety of Chokecherry produces white fragrant flowers in spring followed by edible fruit. Many people never see the fruit since it is so readily taken by the birds. The foliage is what distinguishes this tree from others. When the new leaf emerges it is green, turning red as it matures.

This tree can be grown as a single stem or a large multi stem shrub. If keeping it as a single stem suckering can be problematic.
