

Wavy leaf Oak
Quercus Undulata

Height: 10'-20'
Width: 8'-16'
(At Maturity)
Growth/Yr: 3"-6"
USDA Zone: 4 -7
Flower: Inconspicuous
Time: April /May
Sun: Full Sun
Water: Low

This is a wonderful small tree that is native to the southern Rocky Mountains. It has thick leathery leaves that can be somewhat blue in color with wavy margins. In sheltered areas it can be semi-evergreen. It is a wonderful tree for a restricted place.

This was a new addition to the garden in 2012. We are interested in seeing how it will perform in the urban environment.
